

## Mathematics Curriculum Intent

Maths at Shebbear Community School is a journey that begins with the building blocks of number and ends with fluent, confident learners who are excited by the knowledge and understanding of how Maths underpins the world around us.

Mathematical and numeracy skills are embedded across the curriculum, providing opportunities to strengthen core skills. We provide opportunities across the curriculum for maths skills to be applied and enhanced through reasoning and problem solving approaches to everyday experiences.

Our goal is to support the development of a risk-taking and supportive culture among our pupils, where Maths is viewed as a positive challenge to be embraced by pupils, parents and the wider community. We aim to enable confident Maths learners, who are able to manipulate numbers and who have a love for the challenge of a challenge!

Alice Fuller  
Mathematics Subject Leader
